

For your information, on May 12, 2005, the following message was sent to our previous H&H contacts list. We have developed a separate H&H list that hopefully covers more of the people we want to notify. We hope this information is helpful.

HEC-RAS 3.1.3 Now Available

A new version of HEC-RAS (3.1.3) is now available from our web site. Version 3.1.3 is an update for version 3.1.2. The bugs that have been found and fixed can be viewed in the release notes for this version, which is available on our web page.

The HEC-RAS documentation is available in PDF format (Version 3.1 documentation is still applicable for Version 3.1.3). To read and or print these files you will need the Acrobat PDF Reader version 5.0 or newer. If you do not have this version of the Acrobat Reader you can get it for free from the following web page:

<<http://www.adobe.com/products/acrobat/readstep.html>>

To obtain the new version of the HEC-RAS from the HEC web site, go to the following URL:

<<http://www.hec.usace.army.mil>>

In the past we supported multiple download versions. With this release we have streamlined the process down to a single download that has the program files, the documentation and the compressed example projects.

The example projects are now installed by individual users of the HEC-RAS program and can be installed the first time the program is run or at a later time from the "Help" menu.

This release also contains a Terms and Conditions for Use (TCU) statement that must be agreed to when installing the program and when the program is run for the first time (per user). This TCU has also been made available from the Help menu.

We hope you enjoy using this version of the software. If for some reason you can not download this software, please contact us by E-mail, or phone us at 530-756-1104.

Mark R. Jensen
